

Key Creation Science Resources

Choose one of the four Key Resources below to read along with the lessons. Resources are listed alphabetically. The  symbol indicates a resource appropriate for grades 4-12 or family read aloud. All other books are appropriate for young adults or adults.

  [The Amazing Story of Creation: from Science and the Bible](#) by Duane T. Gish, D. Dish, Earl Snellenberger (Illustrator) 

From dinosaurs to DNA, the story of creation truly is amazing! The evidence of creation presented here is entertaining, educational, and easy to understand. At times, the book presents a humorous look at the predicament in which evolution finds itself—trying to explain that which only God can do. Library Binding (October 1996) Master Books; ISBN: 0890511209. An excellent read-aloud book for the entire family.

  [It Couldn't Just Happen: Fascinating Facts about God's World](#) by Lawrence O. Richards 

Pay no attention to the reading level for this book. Every Christian should read it—adults and children. Young people are bombarded by the media and public schools with the theory of evolution. It's up to parents and teachers to tell our children the truth about the creation of our world. The Lord has given us literally thousands of evidences to prove that He created and sustains the universe. *It Couldn't Just Happen* fascinates kids—and adults—with examples of God's works. Paperback - 192 pages Reissue edition (October 1994) Word Publishing; ISBN: 0849935830. Reading level: Ages 9-12.

 [The Lie: Evolution](#) by Ken Ham 

Humorous and easy to read, this book powerfully explains the need for Christians to defend their faith. This book will not only strengthen and support the facts of creation, but is an eye opening look at the harmful effects of evolutionary thought on modern culture and religion. Ham explains the importance of understanding the true nature of the creation/evolution controversy stating, "If

Genesis is only myth or allegory, then Christian doctrines have no foundation.”
Paperback - 185 pages (November 1989) Master Books; ISBN: 0890511586.
Reading level: high school.

[Unlocking the Mysteries of Creation](#) by Dennis R. Petersen  

Unravel the puzzles of the past through a fascinating study of science and Bible history, and discover how missing pieces fit comfortably into the Bible! The abundance of facts and biblical insights in this unique work has been enthusiastically received by live seminar audiences for many years. Contrasting the biblical case for origins with the evolutionary view, Mr. Petersen skillfully helps both beginner and scholar to “prove all things” and build a world view that is defined by scripture and enhanced by tangible discoveries. Many observations from study of life, the earth, and the heavens emphasize God’s invitation to “come and reason together.” Adding the fascinating study of advanced achievements of ancient cultures, this life-changing course prepares families to confidently “give a reason” why they believe the Bible is true. Creation knowledge comes alive in this mini-encyclopedia exploration of dinosaurs, archaeology, and ancient mysteries of the Incas, Aztecs, Egyptians, and more! Hundreds of original illustrations and four fully indexed sections with Scriptural references. Hardcover - 207 pages (January 1990) Creation Resource Foundation; ISBN: 0890511373.

Literature

Good novels to read (aloud or independently) during the duration of this study.

[Dinosaur Quest at: Diamond Peak](#) by Christina and Felice Gerwitz

A fiction novel. Rocky Mountain National Park is home to thousands of wild animals, but a dinosaur? Can it truly be possible that the fossilized remains of a Tyrannosaurus rex are millions of years old? Dr. Jack Murphy has been hired to photograph it for a creation science magazine. A turn of events thrusts his teenagers into the middle of this project. It is now up to fifteen-year old Anna and Sixteen-year old Christian to complete the assignment. Paper back 208 pages. Media Angles. ISBN: 0970038569. Reading level: Ages 12 and up.

[The Missing Link: FOUND](#) by Christina & Felice Gerwitz

A fiction novel. Join fifteen-year old Anna and sixteen-year old Christian Murphy as they travel from the Florida Keys, to the Peace River in Arcadia, Florida following a trail of adventure, mystery and suspense! During an excavation on the Peace River, their uncle, archeologist Dr. Mike Murphy makes a startling discovery. The Missing Link has been found which once and for all can prove evolution and disprove creation. But what about the Bible? Did God create the world? Follow Anna and Christian who along with their father, archaeologist and photographer Dr. Jack Murphy face danger and a race against time. Is it possible

that a deadly illness, mistaken identity, rare coins, and fossils can all be connected? In the Truth Seeker's Mystery Series, you will experience adventure, mystery, heart stopping suspense and faith played out first hand by the Murphy family. This action adventure mystery will keep you guessing until the very end! An excellent book to read aloud during your creation study. Paperback 191 pages, Media Angels. ISBN: 0970038593. Reading level: Ages 12 & up.

  [Dry Bones and Other Fossils](#) by Gary E. Parker, Jonathan Choug (Illustrator), Jonathon Chong (Illustrator)

A picture is worth a thousand words—the illustrations in this book show how ridiculous evolutionary theory is (for example, picture an amoeba to a monkey to a man). Revised, enlarged, and colorized, this book is a real treat. You will join the Parker family on their annual fossil hunting adventure, as Dr. Parker explains to his children what fossils are and how they are formed. They show that fossils are evidence of Noah's flood, not evolution. Hardcover Revised edition (August 1995) Master Books; ISBN: 0890512035. Reading level: Ages 9-12.

 [The Evidence of God](#) by Zola Levitt, Dr. Gerald Schroeder
Description: In these two videos, Levitt interviews Israeli scientist, Dr. Gerald Schroeder, and an American scientific journalist. Tape One, Part 1: The Universe had a Beginning—Scientist Gerald Schroeder introduces his theory that equates generally accepted observations of science with the creation account recorded in Genesis 1. While science sees the big bang as the beginning of the universe, the Bible records the event of creation as day one. Looking backward, science sees fifteen billion years since the big bang. From God's perspective, this vast time period all happened within

six 24-hour days. Science observes that the universe has expanded a million-million times. Dividing fifteen billion (the number of years as observed by science) by a million-million equals .015 years, or approximately six days. The amount of complexity that went into the creation of the universe makes the chances of life virtually impossible without some external force providing order, namely a Creator. Using the Hebrew translation, Schroeder and Levitt analyze the creation account. Out of a chaotic system, humanity will come six days later. Tape Two: Schroeder and Levitt analyze the second through sixth days of creation. Random evolution is proved impossible. These videos show that science reveals an explosion of life that fits in sequence and time placement with the biblical narrative and Schroeder's computations. Available through Zola Levitt Ministries, Box 12268, Dallas, TX 75225-0268. (214) 696-8844.
